APPIA LISTED IN TOP 500 MANAGED SERVICES PROVIDERS GLOBALLY AND AS A TIER 1 TOTAL SERVICE PROVIDER

Traverse City, MI, June 10, 2016: Appia Communications, Inc., a leading Cloud managed services provider, is listed number 59 in MSPmentor's list of the top 500 Managed Services Providers in the world.

"We are delighted to be included in this list again," said Victor von Schlegell, Appia's CEO. "It is an honor that reflects the loyalty of our customers and the commitment of our talented staff."

Appia was also listed as a Tier 1 Total Service Provider (TSP).
The TSP ranking is measure of a company's potential based on services revenue and productivity. "I have come to understand what separates some [Managed Services Provider] companies from others,"said Jim Lippie, founder and principal analyst and Clarity Channel Advisors, the developer of the Clarity Intelligence Platform. "Our goal [for TSP] was to quantify this." Von Schlegell added, "We have worked very hard to develop a broad range of managed services because we want our customers to realize operational simplicity and lower costs. This ranking recognizes our efforts."
