

**Appia Communications and Pangaea Networks Partner to Serve Up a Winning Recipe in New York Metro | The combination of affordable Appia managed services with reliable Pangaea fiber access delivers a unique business solution for our customers**

NEW YORK, NY and TRAVERSE CITY, MI - May 30, 2012 - Appia Communications, a leading provider of managed communications and network services, today announced a partnership with Pangaea Networks to provide Appia's services to customers in buildings connected to the Pangaea state-of-the-art fiber optic network.

The new services include: hosted VoIP, SIP trunking, video conferencing, nationwide networking, and managed data services.

"For customers in Pangaea-lit buildings, Appia can now deliver our cost saving services with best-in-class reliability and price," said Jason Ulm, Vice President of Sales at Appia Communications. "The customers we serve with Pangaea fiber access will have unlimited bandwidth available at considerable savings."

"We are thrilled that Appia is partnering with us to deliver their award-winning managed services across our premier network," said Kevin Black, VP, Business Development of Pangaea Networks. "The buildings we currently serve now have the advantage of an enhanced fiber network linked with a multitude of managed communication services. Now that's a telecom partnership worth talking with your business partners about!"
