

## Meeting Services | meet anywhere, any time

Skyrocketing travel costs and increasing travel hassles demand new ways to collaborate. Our meeting services bring people together, whether they're across town or across the globe.

### Free Services

#### Audio Conferencing

Appia's audio conferencing service is reservationless and available in two versions:

- Standard is free and includes local number (toll) dial-in. (There is a limit of 6 participants (including the moderator) per conference)
- Premium adds unlimited participants and up to 10 recordings at a maximum of 120 minutes each.

You can also customize the service so that it sounds to users as if it's your own.

#### Video Conferencing

Appia Video Communicator (AVC) is easy to set up and use, and because it's a cloud service, there are no expensive multi-conference units to buy and manage.

AVC's exclusive ActiveFrame© technology ensures video quality, even over the Internet. AVC includes desktop sharing, private and group chat, end-to-end encryption and session recording. AVC monthly subscriptions allow unlimited sessions and users (depending on available local bandwidth).

- Standard Definition up to 720x480. Two free standard definition subscriptions are available to Appia customers
- High Definition up to 1280x720
- Extra High Definition up to 1920x1080.

#### Appia Web Meeting

Based on the award-winning BigBlueButton™ platform, Appia Web Meeting (AWM) is intuitive to use and it's free. AWM includes reservationless meeting set-up, voice and video conferencing up to 320x240, document and desktop sharing, chat, and more.

### Join.Me

Appia has an arrangement that enables our customers to use the Business version of this popular service for much less than it costs to purchase the service directly.
