

## SIP Trunks and Packages | lower cost, more flexibility

Each **SIP Trunk** provides one concurrent call and includes inbound usage. Add features such as 911, directory listing, and caller name. Inbound toll-free and outbound calls are charged on a per minute basis.

Our **SIP DID Packages** combine the most popular SIP features. See below for details. They also provide concurrent calls equal to twice the number of DIDs. For example, Package 6 includes 12 call paths. (If you need additional call paths, just request them; there is no charge.) This feature is unique to Appia and provides greater flexibility during times of peak calling.

### SIP Options

**911 Notification** provides an extra level of safety and protection by notifying people in your organization via phone and email when someone makes a 911 call

**Auto-Attendant for Fail-Over** Should your phone system fail, you can fail over to our auto-attendant in the Cloud to provide uninterrupted service to your callers.

**Phone System Colocation** Colocate your phone system in our data center for security and business continuity. Colocation also puts your phone system right where your SIP services are, so there's less latency and better voice quality.

**SIP Edge Router** Our SIP edge routers reserve bandwidth for voice so call quality is maintained even when bandwidth utilization exceeds available capacity.

**SIP DID Packages** Order packages based on the number of DIDs and minutes you need.

Package	Total DIDs	Feature DID	Toll-Free DID	Minutes	One-Time	Monthly
6	6	1	1	4,500	\$105.00	\$69.95
8	8	1	1	6,000	\$115.00	\$91.95
